

MOBILITY, Avellino, Italy

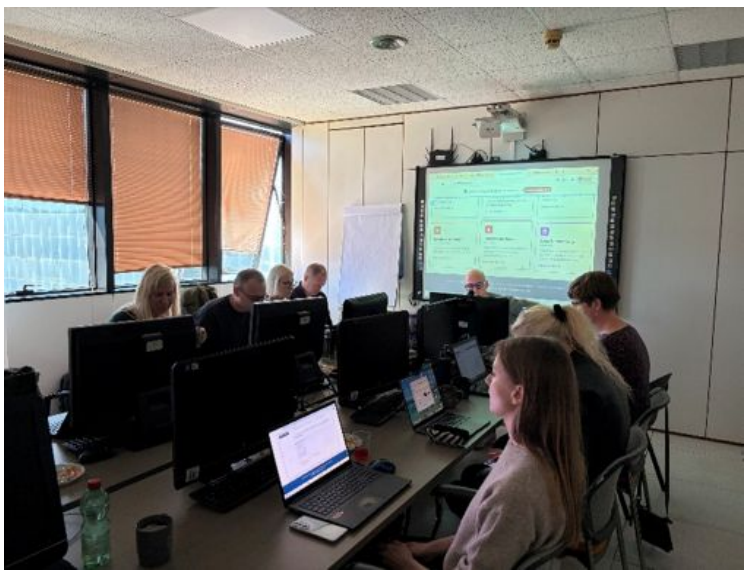

12-16 October 2026

Five Days of Practical Learning, Platform Exploration and International Collaboration

From 12 to 16 October 2026, the VESTA consortium gathered in Avellino, Italy, for a five-day mobility programme hosted by project partner CONFORM S.c.a.r.l. The meeting brought together international partners to explore innovative digital tools, participate in practical workshops and exchange ideas on the further development of AI-supported solutions for vocational education and training.

A key part of the programme focused on the VESTA AI model and competence mapping based on European frameworks, including DigComp, EntreComp and GreenComp. Partners explored the VESTA platform, including competence self-assessment, AI-based interviews, personalised learning recommendations and tools designed to identify skills gaps. The mobility also included practical workshops on the Interactive Strategic Guide for Sales Managers.

Testing, Feedback and Improvements

Beyond presentations, participants had the opportunity to explore the platforms from a user's perspective, evaluate their functionalities and identify areas for improvement. Particular attention was given to usability, navigation, assessment questionnaires, language consistency and the clarity of educational content. The feedback collected during the mobility will support further discussions on improving the tools and enhancing the overall learning experience.

Preparing for the Next Steps

The programme also included discussions on the upcoming piloting phase under Work Package 4 (WP4), during which the developed solutions will be tested with relevant target groups. The mobility provided an important opportunity to strengthen cooperation between project partners and ensure that the tools being developed respond to the real needs of SMEs, sales professionals and VET providers.

We would like to thank CONFORM for hosting the mobility and all project partners for their active participation, valuable feedback and collaboration.
